Upcoming Webinar: When are Cloud-Related Technologies Not the Best Solution?

Join Outsourcing Institute's Webinar on Thursday, January 31st, 2013 from 12-1 pm EST to gain insight from Sylvan Advisory with industry expertise in outsourcing solutions.

When are Cloud Related Technologies Not the Best Solution?

Date: January 31, 2013

Time: 12:00 pm - 1:00 pm EST

Register: [Click Here](#) to Register for Webinar

Cost: Free

From IaaS, SaaS, PaaS to Cloud, vendors are offering solutions that often sound too good to be true. How much of the buzz is real?

When we discuss the terms mentioned above, a closer look reveals that each application requires careful evaluation before making the purchasing decision. To help you choose cost effective solutions and protect yourself against selecting inappropriate technology enhancements, this webinar will offer examples of situations where cloud solutions are not the right tool for the job.

The webinar will discuss when cloud and cloud-related technologies make sense and when they do not. It will also cover legacy technologies, such as older mainframe and AS/400 systems, and explain what specific solutions are most effective.

Our expert speakers will cover the following key topics:

- How much of the cloud is "real"... with examples of when the cloud is not real
- Choosing between cloud or XaaS...what is the right move for you
- How do legacy technologies fit into your scenario

Make sure you choose the most effective technologies for running your mission-critical applications.

Moderator: Mark Reich, Sylvan Advisory

Date and Time: January 31, 2013, Noon-1pm EST
