

Blue Hill Announces Compliance with PCI-DSS

Published July 2, 2012

Blue Hill Data Services is pleased to announce that it is certified PCI-DSS compliant. Blue Hill's policies, procedures, and technical systems that store, process and/or transmit cardholder data have satisfactorily met the requirements of the Payment Card Industry Data Security Standard (PCI DSS).

PCI Data Security Standard Overview

The Payment Card Industry (PCI) Data Security Standard (DSS) was developed to encourage and enhance cardholder data security and facilitate the broad adoption of consistent data security measures globally. PCI DSS provides a baseline of technical and operational requirements designed to protect cardholder data. PCI DSS applies to all entities that store, process or transmit cardholder data. PCI DSS comprises a minimum set of requirements for protecting cardholder data, and may be enhanced by additional controls and practices to further mitigate risks.

For additional information on Blue Hill Data Services, or its recent PCI-DSS certification, contact Rosary De Filippis at RDeFilippis@BlueHillData.com, or at 845-620-0400.
