Blue Hill Data Services Acquires XyberNET, a Leading Comprehensive Insurance Processing Systems and Services Provider

Acquisition Expands Blue Hill's Applications Services Portfolio and Strengthens Both Companies' Presence in Insurance Vertical

PEARL RIVER, NY – June 1, 2016 Blue Hill Data Services today announced the addition of XyberNET to the company's growing Applications Support services portfolio. The merger further strengthens both companies' strong presence in providing support services to the insurance industry. To XyberNET, Blue Hill and CAPS clients, this merger also brings additional depth, skillsets, and resources to best support their IT needs.

XyberNET has been a proven leader in comprehensive insurance processing systems and services since 1979, serving the credit insurance and debt protection markets. XyberNET's applications software and services help leading insurance companies run their businesses more efficiently and cost effectively.

"We are pleased to announce the merger of Blue Hill Data Services with XyberNET, which represents another key milestone in our 'catapult growth strategy'," said John M. Lalli, Chief Operating Officer and Managing Director of Blue Hill Data Services and Computer Alternative Processing Sites (CAPS).

Ellen Myers, CEO and Founder of XyberNET continued, "Our relationship has been growing steadily since 2004, when Blue Hill began providing XyberNET with data center hosting services, including the cloud-based services of Infrastructure-as-a-Service (IaaS) and Platform-as-a-Service (PaaS). Our clients will continue to get the same great service from the same expert staff, with the additional strength and capabilities that come to us from Blue Hill. It's a win-win for everyone."

Many similarities exist between Blue Hill and XyberNET, the most important being their mission of dedication to the achievement of excellence in client satisfaction, realized through the delivery of superior services and application systems. Having intimate knowledge of their clients' administration requirements and processing needs in supporting the credit insurance and debt protection markets has resulted in their overall success and longevity. All services will continue to be delivered from onshore USA.

John Lalli continued, "Our complementary business lines will expand the offerings available to our joint client base, and we believe this brings together the best in IT applications products and services, expands our Applications Support capabilities, and sharpens our focus in supporting the insurance vertical. We will continue to keep everyone abreast of our latest developments as we work together to strengthen our services and commitment to our clients."

About XyberNET
